

LG LED MONITOR

Innovative technology that delivers a vivid and life-like picture, with convenient features that make LG Monitors a cut above the rest.

IPS

IPS technology controls the liquid crystal display to help keep distortion at a minimum and allows users to view images on the screen at virtually any angle.

21:9 Ultra Wide

The 21:9 UltraWide screen is optimal for viewing files with widely distributed information, like Microsoft Excel documents.

Conventional

21:9 UltraWide

4-Screen Split

Multitasking at its finest. The 4-Screen Split feature divides the screen into up to four customizable segments.

*Screen Split software runs on Windows Vista/7/8 (software also runs on Windows XP for desktop PC's only).

Dual Linkup

The Dual Link-up feature allows two compatible portable devices to be connected to the monitor and viewed on a single screen simultaneously.

*To use Dual Link-up, one device must be connected to the DisplayPort the other must be connected to either the HDMI or DVI port.

MHL™ (Mobile HD Link)

MHL links your compatible smartphone's display and sound to your monitor so that you can enjoy content, like videos and games, in impressive scale and sound.

10 Point Touch

10 Point Touch delivers fast response times. Freely rotate, drag, and flick on the LG IPS Touch10 Monitor as you would the latest mobile touch device.
